

# Chef Recipe

**Simple Easy Tasty Recipes Book on a Click!**

Prepared by Millie

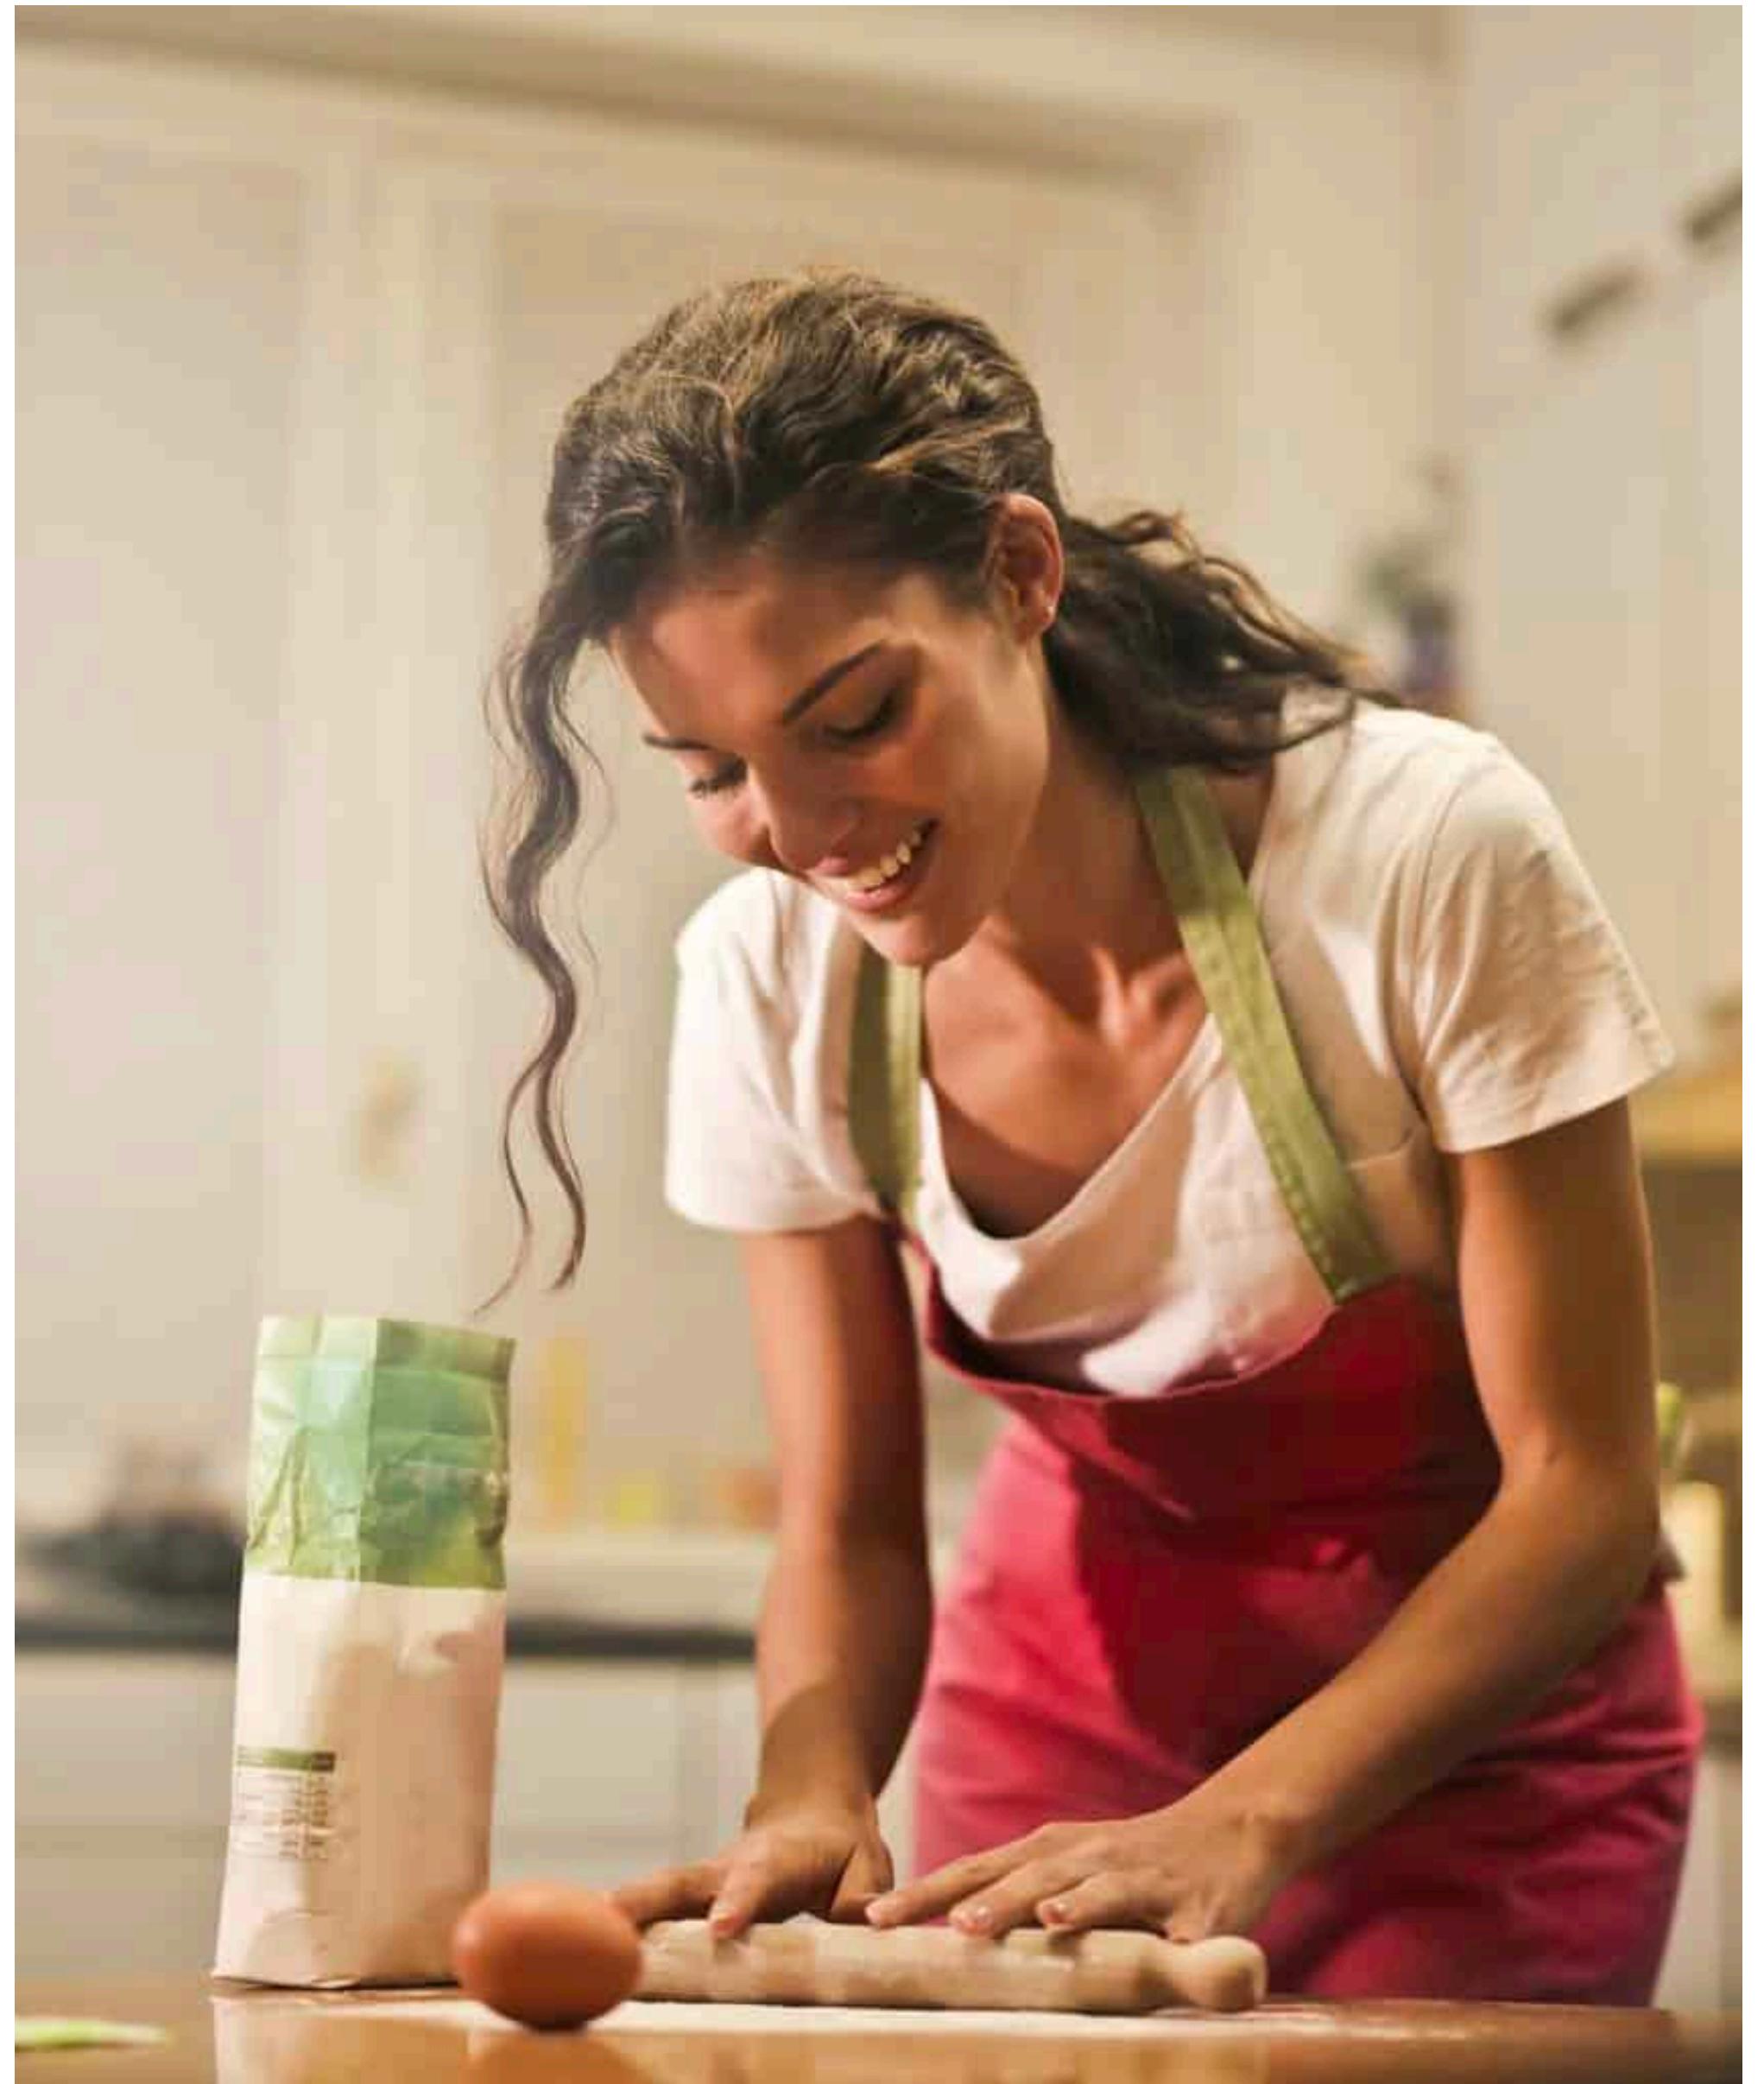

Presented date: 11/17/21

# Design Concept

Everyone can be a Chef and save their yummy recipes in a place with a beautiful tiles presentation!

Besides that, you may find more ideas here to create a New recipe!

# Why Chef Recipe?

- I cook everyday, I don't even know what should I cook today?
- Why those recipes look so hard and complicated to follow up?
- Want to save my yummy recipes somewhere and go back to check if I forget.

# Our Plan is...

Build an easy, simple, tasty recipe book for housewives and someone who needs to cook at home almost everyday like a Chef and they may have a place to save their scrumptious recipes and share with each other.

# Design Process

- Market Research
- Plan and Design
- Build and Create
- Test
- Improve

# Technology Used & Responsibility

## Font End

- HTML / CSS / Bootstrap ➔ Millie
- Javascript ➔ Millie

## Back End

- Config (connection.js) ➔ Millie & Kaden
- Models (Recipe/ User) ➔ Kaden & Millie
- Controllers (routes) ➔ Millie
- View (handlebars) ➔ Millie
- Database (MySQL) ➔ Millie & Kaden
- Seeds ➔ Millie & Kaden
- Authentication (express-session and cookies) ➔ Millie & Kaden
- Environment Variables
- web api Cloudinary ➔ Kaden
- npm package multer ➔ Kaden
- Node.js / Express.js

Let's meet  Chef Recipe!

**Simple Easy Tasty Recipes Book on a Click!**

# Challenges

# What I learned..

- How to successfully run npm seed when seeds files have some issues, like if you use type of STRING, it won't let you type over 255 words but type of TEXT
- How to publish to Heroku with Mysql and npm run seed
- How to merge codes without bugs...
- How to prioritize the features when the time and human power is limited
- If you place a Class in a wrong place, it would fail a function

**console.log (“Never give up because you never know the next tries going to be the one that works.”)**

# Future Development

- Be able to add an image while adding a recipe
- Add edit recipe and sharing feature
- Add a rating feature

*Thank you!*
